

Cadillac MOG Series

Power & Control Connector/Cable Assemblies for Marine, Oil & Gas applications

*MOG Mini-power Series,
quick mating, single pole
connector*

*MOG Threaded Series,
multi-pin control connector*

The Cadillac MOG Connector Series...

- Compatibility with other well known brands of connectors
- Provides the highest level of quality, efficiency, reliability and safety for oil field power distribution use
- Offers various multi-pin insert configurations, hardware and contact options to provide design flexibility for control and power applications
- Offers contact sizes ranging from 777 MCM to #18 AWG
- Features double-lead Acme threaded coupling to resist cross threading and improve mating efficiency
- Features machined aluminum shells for high strength and impact resistance
- Connector hardware is finished with a durable, Hard Anodic coating for harsh environments
- Connectors are easily terminated onto Draka Cableteq cables for Marine, Oil and Gas industry applications

The Clements National Commitment to Value

- Offering high quality, premium and innovative products
- A dedicated ISO 9001:2000 Certified manufacturing facility committed to continual improvement
- An understanding of customer service by communicating and listening effectively to our customers
- Providing an experienced team of highly trained personnel to service a customer's total commercial and technical needs...at Clements National service is a commitment!

Achieve total customer satisfaction through our dedicated and focused team partnership with Draka Cableteq Division

Cadillac®

Solution-Specific Connector & Cable Assemblies for Marine, Oil & Gas applications

Through a unique partnership, Clements National and Draka Cableteq have created a team of connector and cable specialists to engineer complex connector and cable assembly solutions for the rugged environment of the Marine, Oil and Gas industries.

This is a team backed by the finest production facilities assuring you optimum design and the highest quality assemblies available. Proper selection of the connector and cable is critical for dependable electrical performance in harsh environments that can include daily rough handling, salt corrosion, sand and dust, moisture and humidity, drilling mud, oil, and severe temperatures.

Complete connector and cable solutions, utilizing the expertise, experience, and capabilities of two respected companies are now available to you with a single inquiry.
